// ABOUT ME

I've loved working with computers since 3rd grade, and I want to use them to make amazing things. In middle school I was apart of my school's tech crew. In high school, I was on my school TV station, computer club, and I helped create our school's Hour of Code. Once I know of something that could be fixed with an app or web service, I'll plan it out and work on it until it's a refined product.

I'm just starting out, but i'm always working and willing to learn.

// EXPERIENCES

● NoiseHub

I came up with the idea for NoiseHub in 2015. Since then we've had a round of funding, won the JD Brown Center's Elevator Pitch competition, and released several betas. More info can be found on NoiseHub.co

● Awards

- WWDC Scholar – 2015, 2015
- Best Hack Built with Contactually API – Bitcamp Spring 2016
- JD Brown Center Elevator Pitch Competition
- NCWIT Aspirations in Computing Affiliate 2015

● Outreach

I care about getting people in my community involved in coding. Some of the ways I've expressed that are through these inititaves.

- Hour of Code Chair – CYHS 2014, 2015
- YCPHacks Cofounder – YCP 2016

// EDUCATION

Graduated Central York High School

Graduated in 2015

Studying CS @ York College of Pennsylvania

Graduation set for 2019

// INTEREST

CODING / DESIGN / MUSIC LISTENING / TRAVEL
